

uv

Bonus: Switching from poetry to uv

Why uv?

Faster (thanks to Rust)

Installation

e.g.

```
brew install uv
```

or

```
curl -LsSf https://astral.sh/uv/install.sh | sh
```

Migrating from poetry: *pyproject.toml*

- ❑ In repo root run ``uv tool run migrate-to-uv --dry-run``
 - Note: You may need to manually remove some poetry-specific sections in the `pyproject.toml` e.g. ``[tool.poetry.group.*]``
- ❑ If happy with changes, then without ``--dry-run``

Next: We need to update any workflows: *cicd.yml*

Migrating from poetry: *cicd.yml*

e.g.

```
- name: Set up Python
  uses: actions/setup-python@v5
  with:
    python-version: 3.12

- name: Set up Poetry
  uses: Gr1N/setup-poetry@v9
```

```
- name: Set up Python and uv
  uses: astral-sh/setup-uv@v7
  with:
    enable-cache: true
    python-version: 3.12
```

and map other `poetry ...` to equivalent `uv ...` commands
